***Welcome to our
roundtable series.
We're glad you're here.***

The
John A. Hartford
Foundation

THE SOCIETY
FOR POST-ACUTE AND
LONG-TERM
CARE MEDICINE™

Our Work Together

JoAnne Reifsnyder PhD, MSN, MBA, RN, FAAN
Professor, Health Services Leadership and Management
University of Maryland School of Nursing
Former Chief Nursing Officer, Genesis HealthCare

The
John A. Hartford
Foundation

This Year's Focus....Leadership & Culture

- The role of leadership in staff retention and recruitment
 - How can medical directors have an impact on facility culture?
 - How can medical directors, administrators, directors of nursing and others in leadership work together to develop sustain a positive work culture?
- Live leadership modules to kick off in January 2024 with practical, evidence-based “try this” approaches that can help you improve your leadership style

To Level Set....

- We are a community focused on co-design
- “All teach, all learn”¹
- Small tests of change
- Collation and dissemination of insights
- www.paltec.org/goodthing

Today's discussion...

NDWS

**NATIONAL DEMENTIA
WORKFORCE STUDY**

Donovan Maust, MD
University of Michigan

Joanne Spetz, PhD
University of California, San Francisco

Background

- In 2020, 6 million Americans living with dementia
 - 14 million by 2060
- Millions of workers serve this population and have enormous influence over the quality and costs of care
- Very little is known about the dementia care workforce and how they influence care and quality outcomes for the population they serve

- New \$81 million cooperative agreement (U54) with National Institute on Aging
 - September 30, 2023 through August 31, 2028
- Surveys of the workforce that serves people living with dementia
 - Clinicians (physician, APRN, PA)
 - Licensed professionals (e.g., RN, LCSW)
 - Direct care workers (e.g., nursing home assistants, home care aides)
- Survey data can be linked with patient outcomes and facility data
- Pilot grants to accelerate use of the data

The Team

Leadership:

- Donovan Maust, MD, University of Michigan, geripsych (MPI; contact PI)
- Joanne Spetz, PhD, UCSF, economist (MPI)
- James Wagner, PhD, U Michigan Survey Research Center
- Steven Marcus, PhD, U Penn
- Laura Wagner, RN, PhD, UCSF

Other partners: Alzheimer's Association, UNC-Chapel Hill, Brown, Yale, and Mathematica

The Core(s) of NDWS

A family of 4 surveys

- Community Clinician (including MDs, Nurse Practitioners, Physician Assistants)
 - Nursing Home Staff
 - Assisted Living Staff
 - Home Care Staff
- licensed nurses
- direct care workers

A total of 75,000+ surveys over 5 years starting this summer!

The family of surveys: Clinicians

- Physicians (primary care internal med, family med, geriatrics, neurology, psychiatry), NPs, and PA who have billed Medicare or Medicaid for any patient with a dementia diagnosis
 - Step 1: identify patients with a dementia diagnosis in the past year
 - Step 2: identify clinicians who have billed for them in any setting.
 - Step 2A: pharmacy claims to better identify NPs and PAs
 - Step 3: Stratify frame based on setting of billing, volume/percent of dementia patients, clinician type, rural/urban, etc.
- N=20,300 over 5 waves; some longitudinal surveys
- Link data to Medicare and Medicaid claims

The family of surveys: Nursing homes

- Nursing homes with any dementia residents
 - Step 1: develop stratified frame of nursing homes, recruit facilities to participate
 - Step 2: obtain rosters of staff from nursing homes
 - Step 3: sample from rosters
- N=19,140 over 5 waves; some longitudinal surveys
- Link data to LTCFocus, Minimum Data Set, Payroll Based Journal administrative data
- Encourage nursing homes to participate in the Long-Term Care Data Cooperative electronic health record database; link to this if available

Key survey content domains

- Demographics
- Education, Training, Experience
- Employment Status
- Dementia Care Knowledge, Attitudes and Practices
- Working conditions and organization practices
- Worker outcomes

Bonus survey: Administrators

Will be asked for each organization participating in Nursing Home, Assisted Living, and Home Care Staff surveys

- Practice Setting and Characteristics
- Training Provided
- Dementia-specific care
 - diagnosis
 - cognitive testing
 - access to disease-modifying treatments (e.g., anti-amyloid drugs, biomarker testing, dementia education, advance care planning)

Follow-up!

- All 4 surveys will include a longitudinal follow-up component to help us understand workforce exit

Making the data accessible

- Public-use files (standalone survey data)
 - First unweighted files available in August 2024 (“beta data”)
 - Full Y1 datasets available in early 2025
- Restricted-use survey files with linked data
- Pilot awards available to encourage use of the data (\$85K each)
- Webinars and information sessions to support users
- Annual data user conferences (starting Year 3 [2025/26])

Key survey content domains

- Demographics
- Education, Training, Experience
- Employment Status
- Dementia Care Knowledge, Attitudes and Practices
- Working conditions and organization practices
- Worker outcomes

What do YOU think we should ask about?

Thank you!
