“

CAREASCEND app came in very handy during a recent state survey, Surveyor was evaluating medical director's participation at QAPI... Signed participation was missing... Administrator shared CAREASCEND monthly reports with the surveyor and was it accepted as acknowledgment of medical director participation during the center's QAPI process. Great outcome here.

“

CAREASCEND has proven invaluable with reviewing medical director time sheets. The medical director can input her tasks in real time for review by the administrator. This enables the administrator to confirm that the medical director performed the task and seek clarification about the entry. Very valuable tool.
